PROJECTS

Zapling https://lilyofthevalley1618.github.io/zapling

Creator

- Designed and built a free, beginner-friendly web app that teaches electronics through short, game-style lessons, covering six units including series and parallel circuits, reading schematics, Kirchhoff's laws, node voltages, superposition, and Thevenin equivalents
- Designed the curriculum and feature set, including interactive exercises, flashcards, unit tests, a heart-based practice system, and a built-in AI tutor (Ask Sprig) that explains mistakes in context
- Developed by directing AI coding assistants; hosted on GitHub Pages with 18 additional units planned covering analog and digital electronics, schematic capture, and PCB design

Python Fundamentals

Self-Directed Learning

- Independently studied Python programming fundamentals, practicing script writing and logic-based problem solving to build analytical and coding skills
